**OUR NEW PRODUCT IN  
URBAN-INDUSTRIAL STYLE**

Modern furnishing concepts and living spaces thrive on interesting shapes, colors and surfaces. With the new ASPERO design line, we are once again creatively addressing the topic of industrial style. The new handles, door handles and the ASPERO sliding door system are sure to fit perfectly into all modern loft furnishings and sophisticated real estate projects.

In addition to the classic knurling technique, we also supply finely grooved surfaces as interesting variants. Typical for MWE are the possible surface finishes in ground, high-gloss mirror polished, burnished or PVD coating. Let us advise you on your individually refined ASPERO handle and sliding door series!

Your MWE team

DOOR HANDLE F GROOVED

DOOR HANDLE F KNURLED

## ASPERO PULL BARS

TG .1113

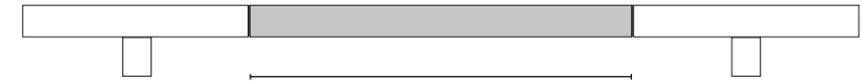

Our classic with completely new possibilities in terms of processing and finishing the surface. Even with individual lengths and large bar diameters, MWE customers can rely on the enormous flexibility of ultra-modern CNC production.

Stainless steel handle, polished

Stainless steel handle bar, burnished

## DOOR HANDLES. KNURLING

STANDARD

Length of knurling up to 11 13/16  
Diameter 20-25mm

CUSTOM MADE

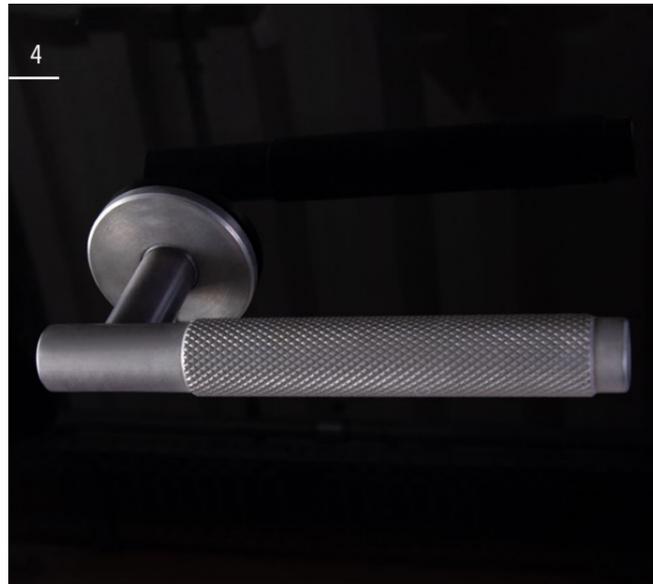

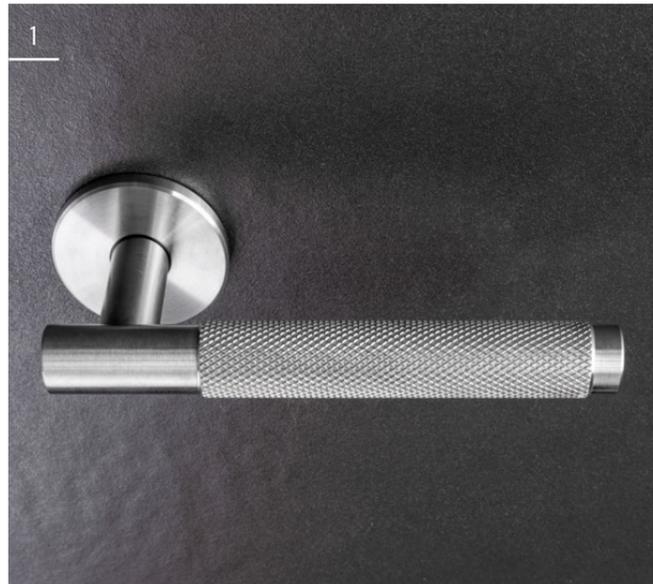

Length of knurling up to 31 1/2"  
Diameter 20-40mm.

The knurling is divided individually. There are subtle shadow gaps visible.

## DOORKNOBS . HANDLES

MWE also supplies handle knobs and recessed grips to match the ASPERO series. The customer can also order surface refinements such as high-gloss mirror polishing, burnishing or PVD coatings.

## ASPERO LEVER HANDLE

TD.1413

With the door handles of the ASPERO series, we deliver a completely timeless handle design with eye-catching knurling or optionally with a grooved finish. Here, too, the diverse surface variants can be ordered from MWE.

1. Polished stainless steel
2. Polished stainless steel,  
Gold finish PVD coating
3. Stainless steel, mirror-polished  
to a high gloss
4. Stainless steel, blued

## ASPERO SLIDING S T.1013

Schiebetür Edelstahl geschliffen

Exciting details with knurling make the new ASPERO sliding door system a real eye-catcher. Of course, this system can also be supplied with the exclusive MWE Soft-Stop technology.
