MWE stands for traditional German workmanship, the highest product quality and boundless passion for stainless steel. We are proud of the unprecedented symbiosis between high-end CNC technology and experienced manufacturing performance that has grown over decades. Right from the start, MWE has stood for the finest surface treatment.

The proverbial finishing touch lets the product shine, pleases the eye of the beholder and inspires as a functional hand flatterer.

All this serves the constant claim to produce timeless and durable masterpieces and to delight their owners as well as all lovers of this living craftsmanship for decades! MWE delivers an outstanding functional design and thus sets strong accents in commercial and private construction.

For many years now, MWE has been developing individual railings, balustrades and staircases in the field of special constructions.

So it is only a logical consequence that with the completely redesigned handrail holders ConceptD, ConceptE,

ConceptF and ConceptG set new accents with immediate effect.

On request, we can also supply individual handrails made of solid stainless steel, tubular profiles or wood in various diameters.

As usual from MWE, you can choose between many different surface variants and combinations. Stainless steel ground, polished, burnished or even gold-plated - a variety that impresses.

Our manufactured products are used with increasing popularity worldwide in the object sector and project-related. Stay creative and be inspired by the multitude of possibilities on the following pages.

From a technical point of view, you can rely on the highest manufacturing quality and particularly easy assembly of all components.

We look forward to the next exciting project!
